

Sielen Namdar, PE is a Global Industry Executive with Cisco's Cities & Communities team and leads Cisco's Global Smart Water Business. She also serves as the Chair of the Americas Partnership Group for Smart Water Networks Forum (SWAN). Sielen works with water/wastewater customers to help them build more resilient systems and operate/maintain/manage their facilities more efficiently leveraging IoT/data analytics. Prior to joining Cisco in 2018, Sielen spent 20 years at Jacobs Engineering (legacy CH2M) developing industry sector partnerships and facilitation of complex cross-business multidisciplinary teams to implement innovative and sustainable solutions for water utilities. She also co-founded CH2M's Smart Cities Initiative, working in collaboration with agencies, technology leaders, and ecosystem partners. Sielen holds bachelor's and master's degrees in civil engineering from the University of Washington. She is currently a judge for Cisco's Global Problem Solver Challenge Program. Sielen is also serving as a coach and mentor for the Seattle Leadership Tomorrow program, a civic leadership organization focused on exploring strategies for positive change that cross sectors and silos to foster healthy communities.
